

# JetAire™

## High Velocity Fan

**JetAire Shown  
with Optional  
Oscillator and  
Pedestal**

*(see back side for  
other options)*

Patent Pending

If your air moving requirements are for concentrated air velocity at distances of 100 feet or more, Triangle's JetAire High Velocity Fans are an excellent choice. Available with or without oscillation, the JetAire is an ideal selection for industrial/commercial and golf course applications.

For added versatility, the JetAire barrel can be tilted to direct the air flow in the desired direction. This, along with a variety of optional mounting equipment, will serve almost any requirement. For golf courses, select the pole or tree mount, manufacturing facilities, warehouses and agricultural applications, the column or beam mount or, for mobility, the hand truck mount. Whichever you choose, the JetAire will put the air where it is needed the most.

JetAire HV fans are equipped with **Totally Enclosed Motors** and **Polypropylene Barrels**, making them suitable for operation in dusty and moist environments. Metal components are finished with a polyester powder coat.

The HV 3013 and HV 3015 are also ideally suited for operation in dairy applications equipped with mist type cooling systems.

When considering air moving products, Triangle can either supply a standard product or tailor one specifically for your requirements.

**1-800-255-9014**

**Beam-mounted JetAire**  
Order Fan plus VMB 2430  
(Specify dimension "D" when ordering)

**Basic JetAire Fan**  
HV 2413, HV 2415, HV 3013, or HV 3015

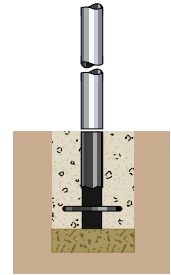

**Post-mounted JetAire**  
Order Fan plus HMB 2430  
**Tree-mounted JetAire** (not shown)  
Order Fan plus HTB 2430

**JetAire is also available with Dolly Mount**

**45° Pedestal mount & base**  
PB 2430

**The JetAire may be mounted on a permanent, owner-provided post**
